

## Exploring Other Funding Requirements

Does the HUD CoC-funded project operated by your agency receive financial support from another funding source? Does the other source(s) have requirements that conflict with CoC requirements or your agency's efforts to operate in alignment with housing first and coordinated entry?

The questions below are intended to guide conversations to obtain concrete information about the funding sources and the extent of the conflicting requirements.

1. What funder has a requirement that conflicts with CoC requirements or housing first implementation? Describe the conflicting requirement and the funding source.
2. When did the project first receive funds from this source?
3. Where has the funder documented the requirement (e.g., within the contract, a federal regulation, an email/written communication)? (provide copies of these documents)
4. Is the requirement continually referenced by the funder (e.g., is the requirement embedded into processes such as annual contract executions, annual audits, etc.)? If not, how has the requirement shown up? (provide copies of these documents)
5. What advocacy/conversations has the agency had with the funder to attempt to obtain flexibility or remove the requirement? (provide copies of these efforts)
